EXPERIENCE

Medallia, Buenos Aires — Sr. *Software engineer*

March 2020 - PRESENT

- Worked on a team called Text Analytics, developing features and fixing bugs of the backend services.

Increase, Buenos Aires — SSr. *Software engineer*

APRIL 2018 - MARCH 2020

- Implemented a microservice architecture for the company's main product that reduced memory usage up to 70% and response times up to 50%.
- Developed a recurring payments service used within the company that became a new product.

Wolox, Buenos Aires — *Software engineer*

JULY 2015 - APRIL 2018

- Architectured and developed multiple applications in various fields for our clients (e-commerce, social networks, fintech, travel, car rentals, among others).
- Created and maintained open source libraries and tools that were used throughout the company to reduce development costs.
- Set up Rails coding and test standards and best practices for the entire company.
- Dictated trainings and courses for my colleagues and solved technical doubts.
